Company Overview

Who We Are

Microfund for Women (MFW) is Jordan's first and largest private not-for-profit shareholding microfinance company. The organization is dedicated to empowering entrepreneurs, and women in particular, through an array of financial and non-financial services designed to support their projects and livelihoods while helping them achieve financial inclusion. Founded in 1994, MFW was one of the first MFIs to be licensed by the Central Bank of Jordan, receiving its licensing in April 2018.

Our Vision

At MFW, we envision a more equitable and just society in which women are empowered to break the cycle of poverty and realize prosperity and well-being for an integrated life.

Our Message

We are dedicated to providing sustainable financial and non-financial services to women entrepreneurs of small projects with limited income. We aim to enhance their living standards and those of their families, thereby fostering economic and social empowerment for women.

Our Journey

We embarked on our mission in 1994, primarily focusing on empowering women and fostering their capabilities within the local community. Over 28 years, we have realized many achievements that have significantly contributed to the enhancement of women's roles in society.

1999

A Life-Changing Name

Microfund for Women was registered as a non-profit limited liability company.

2002

Sustainability is the Foundation of Success

Achieving financial stability.

2018

Transparency and Commitment

MFW falls under the umbrella of the Central Bank of Jordan.

2017

The One Million Milestone

MFW reached a milestone of one million financings.

1994

The Beginning of Change

We started our services in collaboration with the Ministry of Social Development as a microfinance program, with the participation and support of Save the Children and the United States Agency for International Development. We aimed to provide financing for women and promote their financial inclusion.

1996

Planting the First Seed

The program was registered as a local non-profit entity known as the Jordanian Women's Development Society.

2013

100K Across the Kingdom

The services and products of MFW have reached one hundred thousand (100,000) beneficiaries across all governorates.

2015

Pioneers in Family Insurance

Launching the Afyatuna, an innovative microinsurance program at the level of the Arab region, which benefits all family members.

20

2016

20 Years

Celebrating MFW's 20th anniversary since the company's establishment.

2019

With You Wherever You Are

Launching the online services and mobile application.

25

2021

25 Years of Service

25th anniversary of supporting and empowering women in Jordan.

2022

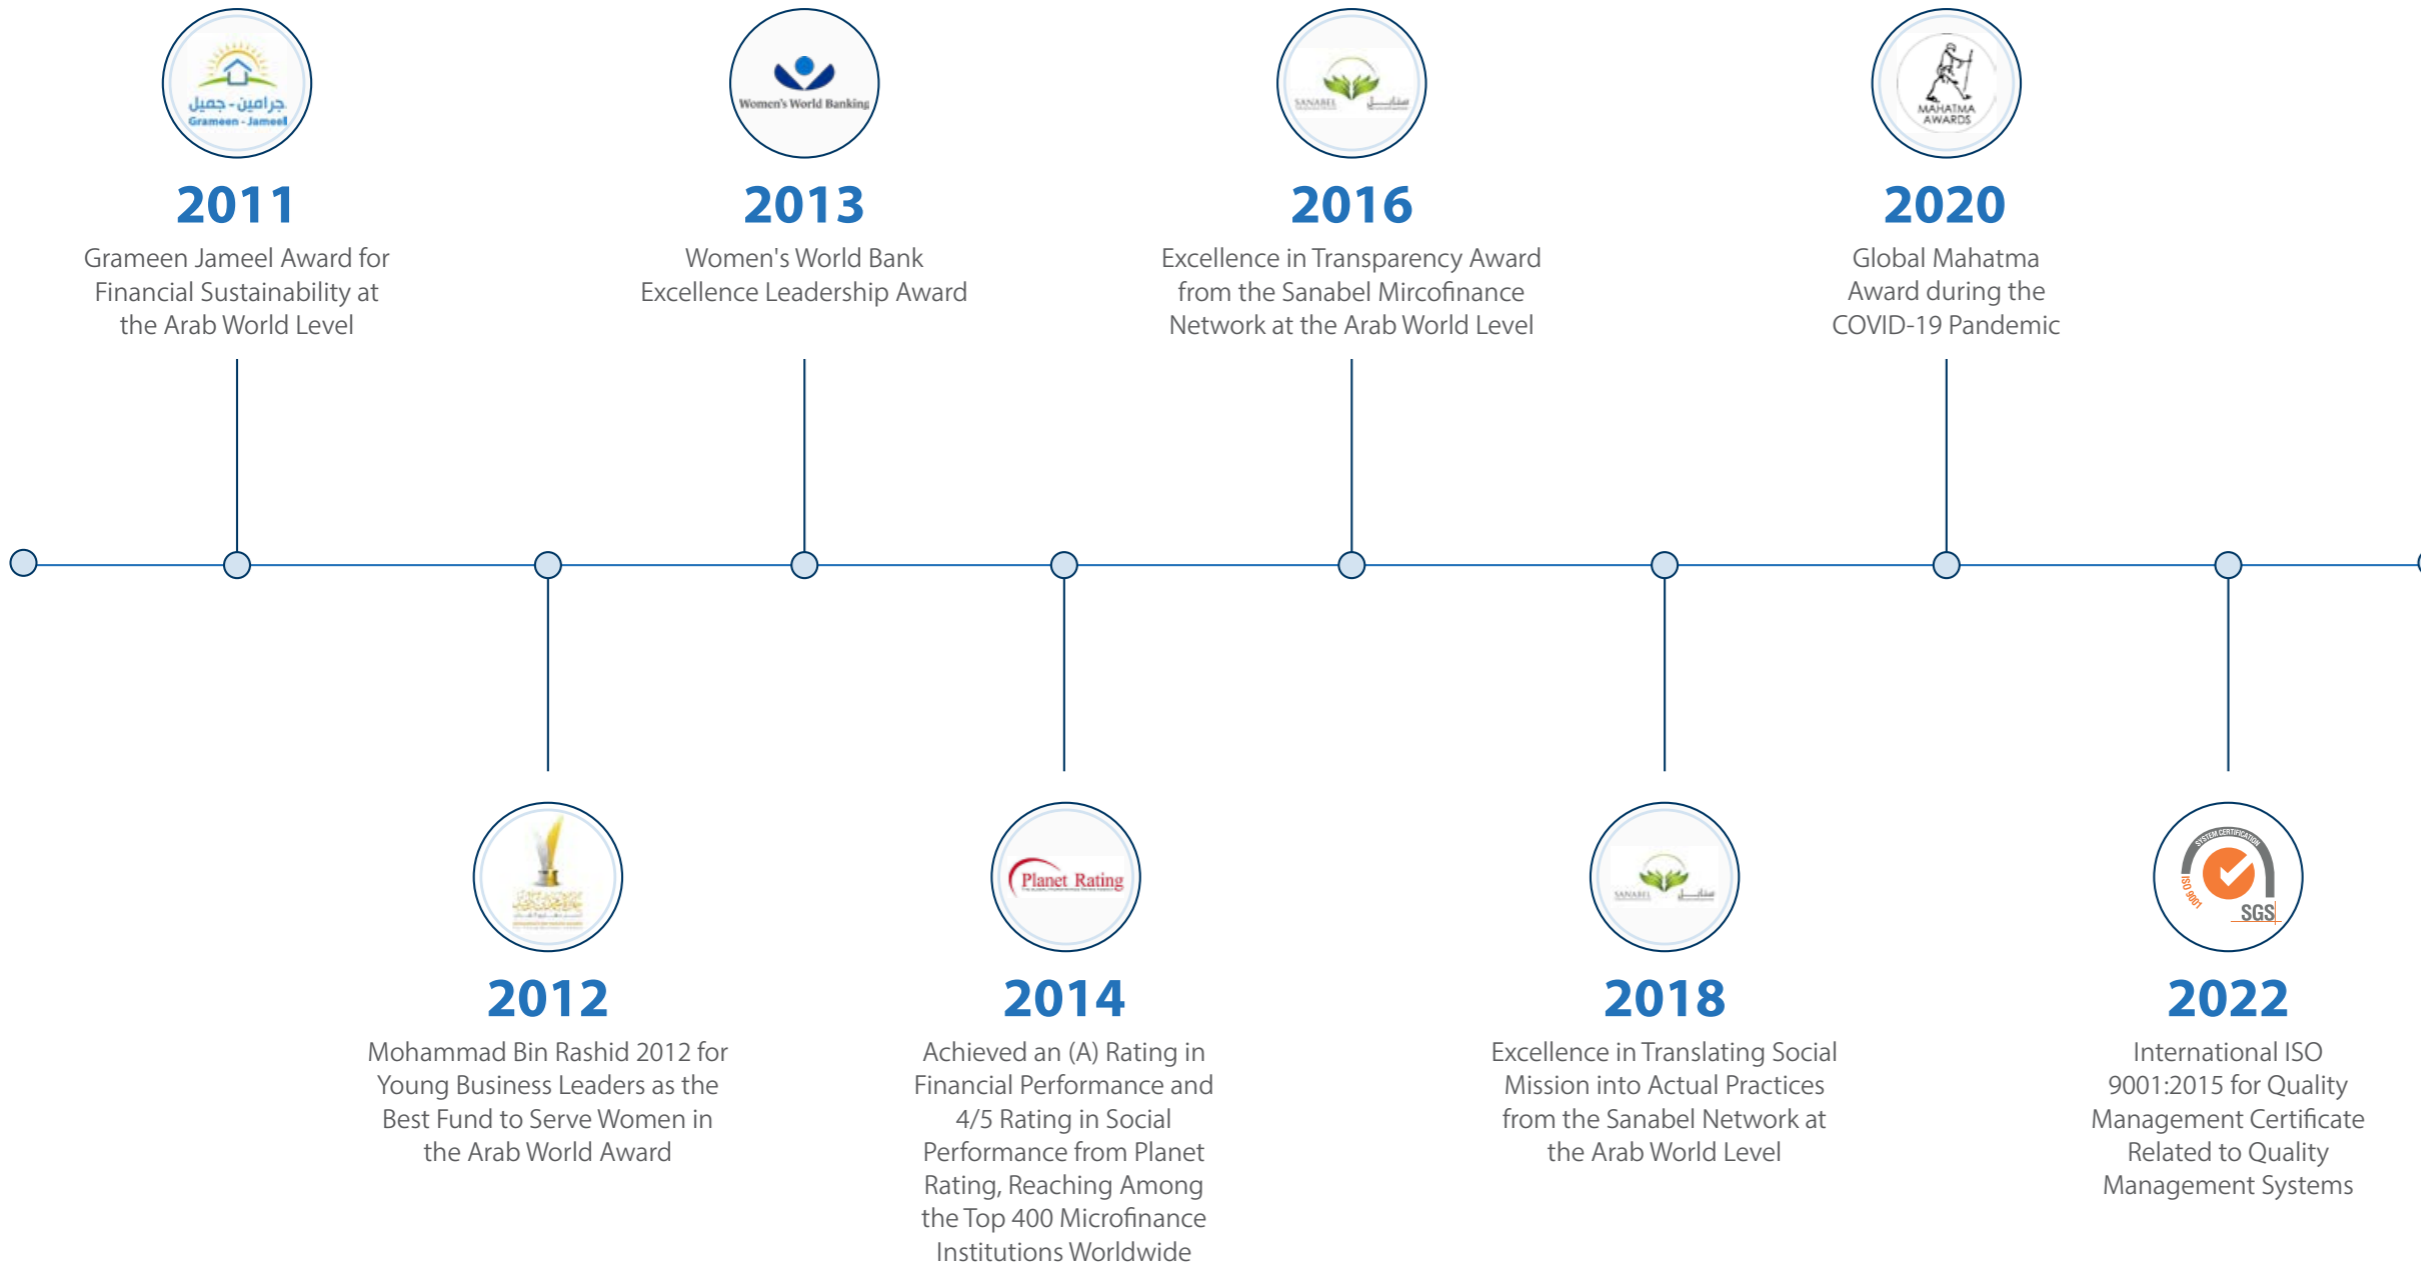

A Certificate of Pride

Receiving the international ISO 9001 (9001:2015) certificate related to Quality Management Systems.

Our Achievements

MFW has received 36 local, regional, and international awards in recognition of its efforts. These include:

Board of Directors

The Board of Directors of Microfund for Women consists of the President and Vice-Chairperson, along with designated members who collectively oversee the company's activities and work.

Chairman's Message

Ghiath Sukhtian

Chairman

As we usher in a new year, I am proud to present our most significant achievements, made possible by the tireless efforts of our distinguished team who have dedicated themselves to supporting every beneficiary of our financial and non-financial services. Over the course of 27 years, the successes of our beneficiaries have stood as living proof of our continued triumphs, further fortifying our leadership position in the microfinance sector.

We take great pride in serving over 133,000 beneficiaries across multiple governorates of the Kingdom. Our website and various news outlets highlight numerous inspiring success stories which reflect our ambitious vision. Additionally, we are proud to have more than 60,000 users of the Microfund for Women application, over 12,000 beneficiaries of our training programs, and over 100,000 beneficiaries of our electronic wallet. These accomplishments could not have been achieved without the committed efforts of our 745 employees, who operate in 63 branches throughout the Kingdom. Our commitment remains steadfast—achieving economic empowerment and financial inclusion for all, especially women, while leveraging the latest technologies to bolster our goals and enhance sustainable societal impact.

At the Microfund for Women, we lead the microfinance sector in the Kingdom, which is continually advancing in its role of improving the social and economic status of women. Modern technological innovations facilitate easier access to our various services. We persist in supporting local products and promoting their reach on the local, regional, and global scales through our comprehensive array of financial and non-financial services. These services empower beneficiaries to transform their ideas into productive and impactful projects that significantly contribute to the national economy.

Collaborating with our partners, we are committed to implementing plans that align with the National Strategy for Financial Inclusion for 2023-2028, launched by the Central Bank of Jordan to achieve goals that include: increasing the financial inclusion rate from 43.1% to 65% by the end of 2028; reducing the gender gap from 22% to 12%; and raising the percentage of financial account ownership for micro, small, and medium enterprises from 52.4% to 75%. These efforts place a dual responsibility on microfinance institutions to achieve considerable progress in this domain.*

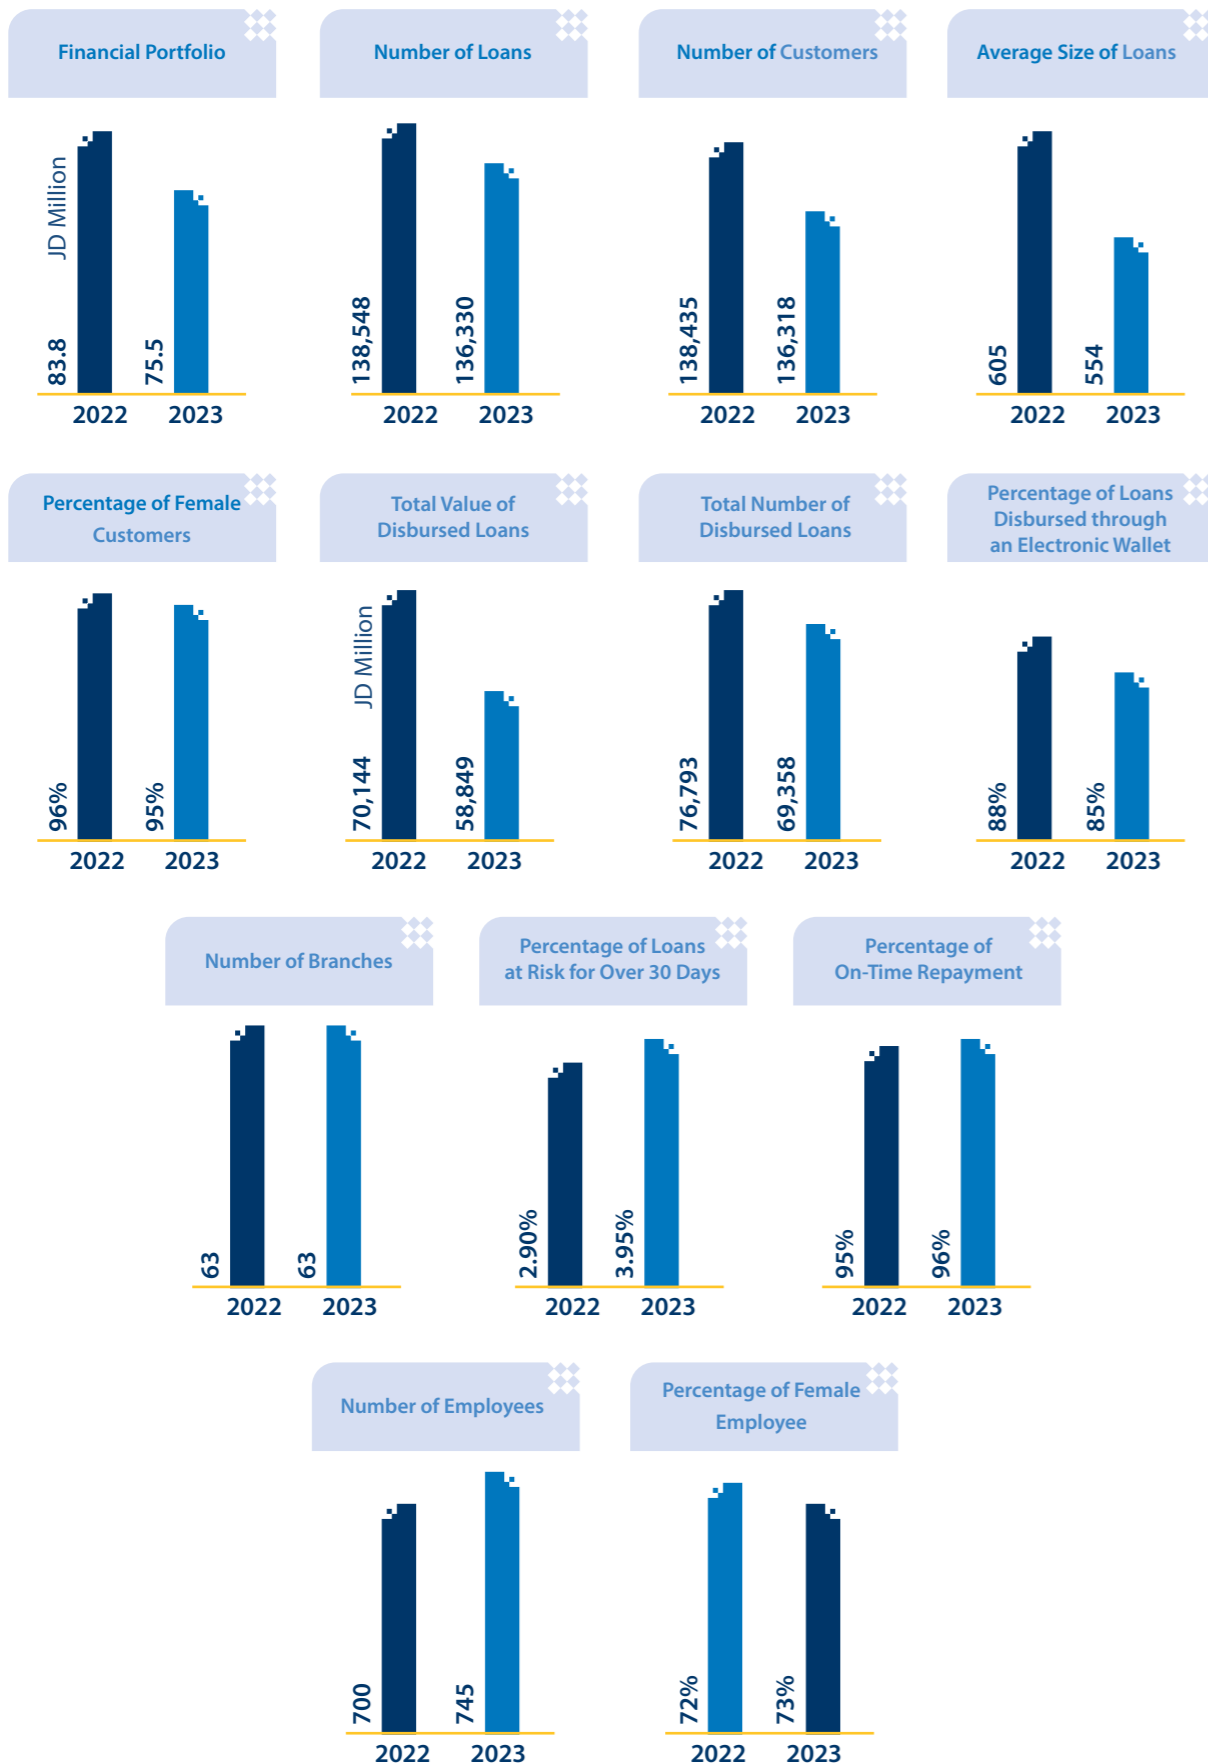

In response to the COVID-19 pandemic and through our long-term strategic partnership with the Central Bank of Jordan, we commenced providing loans at the lowest interest rates in the Kingdom to support small and medium enterprises. Believing that success is the product of continuous and accumulated efforts, we are relentlessly expanding the scope of our services to small, medium, and micro enterprises across the Kingdom. Additionally, we are building partnerships that contribute to reducing unemployment rates and supporting national development.

Under the wise leadership of the Hashemite dynasty, Jordan continues to achieve remarkable progress. The Microfund for Women is proud to contribute meaningfully to this national journey towards development, growth, and prosperity. We are especially proud of our support for local products and expanding their market reach, recognizing this as one of the essential pillars of economic growth.

In conclusion, I extend my heartfelt gratitude to the entire Microfund for Women family. Your tireless efforts and enduring passion inspire every beneficiary to become beacons of success and achievement. These efforts lay the foundation for our continuous growth. Drawing inspiration from the past, we build upon our current achievements and confidently pave the way for the future.

Performance Indicators for the Year 2023

Financial Position Analysis and Results of Operations for the Year 2022

In 2023, the Microfund for Women was able to maintain the highest market share among microfinance companies, which constituted 24.5% of the financial portfolio, clearly indicating the company's ability to continue competing under any prevailing situation in the region.

The following is an analysis of the financial position and business results of the company for 2023.

First: Financial Position for 2023

Assets:

The assets of the Microfund for Women decreased to 83.235 million Jordanian dinars at the end of 2023, down from 98.429 million Jordanian dinars at the end of 2022—a decline of 15.4%. This reduction was primarily driven by a 58.3% decrease in cash assets, followed by a 10.0% reduction in the net financial portfolio. The decline in the net financial portfolio is largely attributable to the borrowing of funds at the end of 2022, which impacted the comparison with 2023. Additionally, the decrease in the net financial portfolio is mainly due to a reduction in the average size of loans granted. The table below illustrates the development of the main asset items from 2019 to 2023:

Statement	In Millions of Jordanian Dinars					Percentage of Change 2022-2023
	2019	2020	2021	2022	2023	
Cash Assets	7,654.1	5,458.7	8,123.1	13,329.6	5,559.4	%58.3-
Net Financial Portfolio	55,725.4	52,329.9	71,849.1	79,993.7	71,955.3	%10.0-
Intangible Assets	1,372.7	1,037.8	834	898	1,226.7	%36.5
Other Assets	5,431.1	6,228.2	4,595.8	4,208.3	4,493.9	%6.8
Total Assets	70,183.2	65,054.7	85,403.0	98,429.7	83,235.4	%15.4-

The Relative Importance of the Company's Assets for 2023

In 2023, the net financial portfolio continues to be the most significant component of the company's assets, constituting 86.4% of the total assets, up from 81.3% in 2022. Cash assets follow, representing 6.7%, a decrease from 13.5% at the end of the previous year.

Analyzing the contribution of these assets in generating returns for the Microfund for Women—while considering the policies, procedures, and associated risks—reveals the company's proficiency in asset management. This proficiency includes efficiently utilizing fund sources to re-lend to beneficiaries or finance new beneficiaries.

Relative Importance of Assets

Net Financial Portfolio:

This section represents the total net loans granted to customers. For the year 2023, the value of the total financial portfolio amounted to 75.463 million Jordanian dinars, compared to 83.823 million Jordanian dinars at the end of 2022, marking a decrease of 10.0%. The primary reasons for this decline are as follows: a reduction in the average size of loans granted and a lower demand volume from the market, attributed to the ongoing war in the Gaza Strip and its economic impact on customers.

The balance of the expected credit loss provision amounted to 3.507 million Jordanian dinars at the end of 2023, in comparison to 3.829 million Jordanian dinars at the end of 2022. Notably, the coverage ratio of the credit loss provision to the total loans granted was 4.65% at the end of 2023, slightly higher than the 4.57% at the end of 2022.

Liabilities and Equity:

The table below shows the development of the main items of assets during the years 2019-2023:

Statement	In Millions of Jordanian Dinars					Percentage of Change 2022-2023
	2019	2020	2021	2022	2023	
Borrowed Funds	37,558.3	31,681.4	48,281.8	55,173.3	37,876.5	-31.3%
Other Accounts Payable	3,591.5	3,823.1	5,323.9	5,624.2	5,067.3	-9.9%
Lease Contract Obligations	1,015.7	703	769	943.7	722.2	-23.5%
Equity	28,017.7	28,569.2	31,028.2	36,688.4	39,569.3	7.9%

Given the relative importance of the components of liabilities and equity, as illustrated in the chart below, borrowed funds constituted 45.5% at the end of 2023 compared to 56.1% at the end of 2022. Meanwhile, equity made up 47.54% in 2023, up from 37.3% in 2022.

Relative Importance of Liabilities and Equity

Borrowed Funds

The company's financial statements for the year 2023 revealed a significant reduction in total borrowed funds, decreasing by 31.3% compared to 2022, and standing at 37.876 million Jordanian dinars.

This reduction primarily stemmed from sufficient cash reserves available to meet customer demands, as the company primarily borrows funds to lend them to customers.

In 2023, 57.9% of the borrowed funds originated from local banks.

Equity

The equity of the Microfund for Women experienced a significant growth rate of 7.9%. Furthermore, the return on equity achieved an impressive rate of 10%, underscoring the outstanding performance in 2023.

Additionally, throughout 2023, the capital of the Microfund for Women was increased from 1 million Jordanian dinars to 2 million Jordanian dinars. This increase was accomplished by augmenting the capital by 980,000 Jordanian dinars from retained earnings in the form of treasury shares owned by the company. Additionally, an amount of 20,000 Jordanian dinars was deposited in cash by the Ghiath and Nadia Sukhtian Charitable Foundation. Consequently, the Ghiath and Nadia Sukhtian Charitable Foundation's shares in the Microfund for Women reached 1,020,000 Jordanian dinars.

Key Financial Indicators

Statement	2019	2020	2021	2022	2023
Return on Total Assets	2.2%	0.8%	3.5%	6.3%	4.2%
Return on Equity Rate	5.7%	2.0%	8.4%	17.0%	10.0%
Financial Stability	109.7%	100.8%	108.0%	127.6%	110.2%
Financial Leverage Ratio	1.50	1.27	1.75	1.68	1.10
Net Profit Margin	8.9%	3.6%	12.8%	23.5%	15.6%

Second: Company's Results of Operations for the Year 2023

The company has continued its outstanding performance over the past five years despite the challenges, which reflects the company's efficiency in managing its financial resources to provide greater and continuous support to its customers. The table below shows the development of the items in the income statement during the years (2019 - 2023):

Income Statement	2019	2020	2021	2022	2023	Change Percentage 2022-2023
Interest Revenues	15,393,308	13,576,922	17,228,893	22,016,216	21,312,641	-3.2%
Other Revenues	2,181,357	1,753,729	2,063,635	2,062,561	3,295,311	59.8%
Total Revenues	17,574,665	15,330,651	19,292,528	24,078,777	24,607,952	2.2%
Interest, Expenses, and Paid Commissions	3,275,933	2,677,754	2,388,263	3,543,296	3,792,672	7.0%
Total Income	14,298,733	12,652,897	16,904,265	20,535,481	20,815,280	1.4%
Total Operating Expenses	11,644,756	9,471,426	10,596,086	11,573,348	12,249,747	5.8%
Operating Income	2,653,976	3,181,470	6,308,179	8,962,134	8,565,533	-4.4%
Expected Loan Losses Provision	843,624	2,379,672	3,822,272	2,989,964	4,376,958	46.4%
Other Non-Operating Expenses	251,523	250,295	18,912	312,109	357,629	14.6%
Total Non-Operating Expenses	1,095,148	2,629,967	3,841,184	3,302,073	4,734,587	43.4%
Net Income	1,558,829	551,503	2,466,995	5,660,060	3,830,946	-32.3%

Interest Revenue

Interest revenue amounted to 21.312 million dinars, compared to 22.016 million dinars in 2022, marking a decrease of 3.2%. This decline can be attributed primarily to a 10.0% reduction in the value of our financial portfolio.

Other Revenue

Other revenue primarily includes income from financial services provided to the Fund's clients, such as health insurance for clients and their dependents. The Fund is proud to support its clients during these times and is the first company in the microfinance sector legally licensed to offer insurance services.

Interest, Expenses, and Commissions Paid

This category saw an increase of 7.0% compared to last year. Notably, borrowed funds decreased by 31.3% for 2023 compared to the previous year. This suggests that rising global interest rates impacted the increase in interest and commissions. The Fund chose not to raise interest rates for clients, aiming to maintain efficiency and effectiveness in providing financial services at the lowest possible cost.

Operating Expenses

The Fund continued its operations through its branch network, which encompasses 63 branches throughout the Kingdom. As part of its strategic plan, the Fund relocated some branches to better-structured buildings and performed periodic maintenance on all branches. The Fund also fortified its workforce by hiring qualified and experienced personnel, increasing the staff count to 745 employees.

The Fund is dedicated to continuously developing and upgrading its programs to adhere to the best practices in the microfinance sector. This includes full compliance with Central Bank regulations and embracing digital transformation, alongside launching multiple advertising campaigns for new services and products.

Consequently, operating expenses increased by 5.8% in 2023, reaching 12.249 million Jordanian dinars.

Corporate Governance and Disclosure Requirements:

1- Disclosure within the Annual Report on the Existence of Governance Manual and the Company's Compliance with It:

MFW places significant emphasis on corporate governance practices, aiming to increase transparency in order to enhance the confidence of shareholders, the Board of Directors, employees, customers, regulatory authorities, and all parties of interest who are engaged with the company. The company believes that having effective corporate governance practices leads to efficient management, contributing to the achievement of the company's strategic objectives. Accordingly, a Corporate Governance Manual has been developed and approved by the Board of Directors in accordance with the guidelines of the Central Bank of Jordan on corporate governance (No.10/2020) and applicable laws, in line with international best practices regarding corporate governance. This manual represents the foundations upon which the company, along with its relationships with all stakeholders are managed. Furthermore, the company emphasizes its commitment to all provisions outlined in the approved Corporate Governance Manual by the Board of Directors.

2- Board of Directors and a Brief Introduction of Each Member:

Ghiath Munir Sukhtian

Chairman of the Board of Directors

Since 1999

Non-Independent Member

since 2022
Independent Member
Member of the
Risk and Compliance Committee

- Mr. Iyad is a commercial lawyer with expertise in providing consultancy related to project financing and partnerships between the public and private sectors.
- Mr. Iyad began his professional career at a law firm in New York City. After returning to Jordan in 2002, he worked as a lawyer at a leading law firm in Amman for approximately 6.5 years. After that, he joined Eversheds Sutherland as a partner until the end of 2020. During his tenure at law firms, Iyad played a significant role as a local legal consultant in multiple partnerships between the public and private sectors, as well as privatization deals, representing various stakeholders including the government and investors.
- Mr. Iyad studied Law in the US and obtained a bachelor's degree in General Management from the US.

3- The Committees Emerging from the Board of Directors and Their Roles and Responsibilities:

Audit Committee

- The tasks and authorities mentioned below at the least, in addition to any other relevant work as stated in its charter of operation:
 - A. Review the scope and results of internal and external audits of the company.
 - B. Review accounting issues with a material impact on the company's financial statements.
 - C. Review the adequacy and effectiveness of internal control systems in the company.
 - D. Approve the annual internal audit plan, review the observations in the internal audit reports, and follow up on procedures taken.
 - E. Obtain any information from senior executive management and the right to request any person to attend any of its meetings.
 - F. Supervise the internal audit department, periodically review its results, ensure the execution of internal audit departments' recommendations by the executive management, and ensure the enhancement of independence and appropriate positioning of internal auditors within the company's organizational structure.
 - G. Meet with the internal auditor, external legal accountant, and compliance monitoring manager at least once during the company's fiscal year without the attendance of any executive management members.
 - H. Make recommendations regarding the appointment, resignation, and termination of services of the internal audit department.
 - I. Review the observations in the Central Bank reports and external legal accountant reports and follow up on actions taken.
 - J. Provide recommendations to the board regarding the appointment, termination, fees, and all other matters related to the external legal accountant, ensuring that they have the qualifications, experience, and good reputation to perform their duties in accordance with the professional standards.
 - K. Review the company's financial statements before they are presented to the board, particularly verifying compliance with Central Bank instructions regarding expected credit loss provisions or any other provisions as per applicable regulations.
 - L. Review and monitor the procedures that enable employees to confidentially report any errors in financial reporting or other violations, ensuring the existence of necessary arrangements and procedures for conducting independent investigations and ensuring the objective and independent follow-up and resolution of investigation results.
 - M. Adopt an internal audit charter that enhances the function of internal audit, clarifies its authority and relationship with other operations, and provides management support to internal audit in accessing all aspects of the company's operations.

Risk and Compliance Committee:

- The tasks and authorities mentioned below at the least, in addition to any other relevant work as stated in its charter of operation:
 - A. Review the company’s risk management framework, compliance policy, cybersecurity policy related to information security, and credit policy in the company before their approval by the board.
 - B. Approve a cybersecurity program.
 - C. Discuss risk management and compliance reports and provide periodic reports to the board that demonstrate the alignment of existing risks with adopted policies and acceptable risk levels.
 - D. Ensure the availability of a business continuity plan and review it at least once a year.
 - E. Ensure the availability of adequate resources and systems for risk management and compliance, and ensure the independence of risk and compliance management employees for activities that result in risks which the company handles.
 - F. Approve the appointment and resignation of risk and compliance management and refer to the board for approval.
 - G. Review the organizational structure of risk and compliance management and make recommendations on it before presenting it to the board and getting it approved by them.
 - H. Monitor and follow up on compliance policy implementation and evaluate its effectiveness in which the company manages compliance risks.
 - I. I. Monitor any updates related to laws and regulations issued by the regulatory authorities that govern the company’s operations and their associated requirements.
 - J. Approve the credit limits structure for financing products.
 - K. Monitor the analysis of the credit portfolio and discuss credit concentrations.
 - L. Review compliance with cybersecurity policy and program.
 - M. M. Perform any other tasks assigned to the committee by the board that do not conflict with laws, regulations, and instructions governing the company’s operations.

Nomination and Remuneration Committee:

- The tasks and authorities mentioned below at the least, in addition to any other relevant work as stated in its charter of operation:
 - A. Identify qualified individuals to join the board, while considering the capabilities and qualifications of the candidates, and take into account attendance and effectiveness of participation in board meetings in case of re-nomination.
 - B. Nominate to the board individuals qualified to join the senior executive management.
 - C. Determine whether the member qualifies as an independent board member, taking into account the minimum requirements listed in section 1)/(a) of this guide and reviewing it annually.
 - D. Follow established and approved criteria for evaluating the performance of the board, its committees, and the executive director annually, ensuring that the performance evaluation criteria are objective.
 - E. Provide information and summaries on the background of important company topics to board members upon request and ensure their continuous awareness of the latest topics related to microfinance.
 - F. Ensure the existence of a policy for granting bonuses to company executives, reviewing it periodically and ensuring its implementation.
 - G. Recommend setting compensation, bonuses, and other benefits for the executive director and the remaining members of senior executive management.

 - Certified Fraud Examiner (CFE), ACFE
 - Certified Professional Trainer (CPT), IAPPD

Mahmoud Saleh Jarbou'

Risk Department Executive Director

Suhail Fawzi Azer

Internal Audit Chief Director

10- Control, Monitoring, and Risk Management Systems:

MFW manages various risks by identifying possible risks that the company may encounter and determining ways to navigate and mitigate them within an overall framework for risk management. This is done based on the best standards, norms, and practices in the microfinance sector, where the following measures have been taken:

- The company has formed a senior committee for risk management emerging from the board of directors, under the name "Risk and Compliance Committee." This committee is responsible for creating an effective monitoring system and ensuring its proper performance. The committee also approves risk management policies in general and defines their framework. Additionally, an executive risk committee has been formed, which, in turn, manages risks within the company and submits necessary recommendations to the risk committee as needed.
- Separation of various departments such as Risk Management, Compliance Management, Operations Management, and Credit Management with complete independence in management, responsibilities, and authorities.

10.1- Risk Management:

The risk management departments take on the responsibility of managing various types of risks, including:

- Drafting policies and obtaining their approval from the board of directors.
- Analyzing different types of risks (credit, market, liquidity, operations, information security).
- Developing measurement and control methodologies for each type of risk.
- These departments provide the board of directors and senior executive management with reports and qualitative and quantitative information on risk measurement in the company.
- The company has established and implemented an internal Knowledge Management System (KMS), which is an independent automated system parallel to the substantial operating system (Delta). In this system, all change requests and permissions are automatically reviewed to ensure the enhancement and documentation of the data governance principle and authorization delegation. Additionally, it archives all customer documents in parallel with paper files.
- The company continuously develops its automated systems and adds supportive systems that contribute clearly to the measurement and control of various risks (such as introducing Modules Risk within the KMS to automate the process of identifying, measuring, and monitoring risks).
- The company prepares monthly and periodic reports to measure various risks, which are then submitted to the board of directors for necessary actions if needed.

Risks that the Company Encounters:

1. Credit Risks:

Credit risks arise from the possibility of the borrower or third party being unable and/or unwilling to fulfill their obligations on time. In this regard, the company reinforces institutional frameworks governing credit management through the following:

- Specialized independent departments for credit management and credit risk, including:
 - Credit Review Department (managing high-segment credit quality).
 - Credit Control Department (managing low-segment credit quality).
- Credit Portfolio Risk Management Department: primarily responsible for maintaining the overall credit portfolio quality. This includes studying Key Risk Indicators (KRIs) and Key Performance Indicators (KPIs) through the preparation of studies and reports on economic sector performance and industries, comparing them with the performance of portfolios and allocations, and preparing necessary recommendations. These departments prepare periodic reports that measure the following:
 1. Credit concentrations for the portfolio at the economic activity level.
 2. Credit concentrations for the portfolio at the product level.
 3. Reports analyzing delinquency and write-off rates compared to the sector.
 4. Reports for analyzing the credit portfolio performance in terms of concentrations and directions, and comparing it to the microfinance sector performance through the comparative report issued by Tanmeyah Network.

5. Monitoring the application of the accounting standard in financial reports (IFRS9) that is related to calculating credit loss provisions.
6. Analytical reports for controlling market risks and liquidity risks, which may arise due to general economic conditions or monitoring and analyzing internal controls in the company specifically..

- Task division between the Operations department (Branch Management), Credit Management department, and Credit Risk Management department, each granted independent authorities and responsibilities.
- System of approved policies and procedures defining the basis for identifying, measuring, and managing this type of risk.
- Initiating the definition of credit limits at the level of credit type, economic sector, geographical distribution, credit portfolios, etc. (Credit Risk Management monitors these concentrations).
- Authorization and relationship management system that includes mechanisms for granting, delegating, monitoring, and managing relationships for various credit activities in an automated manner.
- Methods for mitigating risks, including:
 1. Having a credit policy approved by the board of directors that considers credit risk control and a working guide governing the terms and procedures for granting credit in a safe manner.
 2. A detailed and accurate study of credit requests by the Credit Management department, considering the appropriate financing structure and regulatory aspects of utilizing the amount and repayment sources.
 3. Granting credit authorities to lower and upper credit committees based on the amount rates.
- Specialized departments to monitor the collection of receivables and overdue debts according to delay and non-payment periods.
- Establishing a legal department to follow up on non-existent debts through necessary legal actions.

2. Operational Risks:

Operational risks arise from the inefficiency or failure of internal operations, employees, systems, or external events, including legal risks. The company established a specialized department for managing operational risks in 2015, administratively reporting to the Risk department.

The company manages operational risks within the following principles:

1. Preparation and approval of operational risk policies by the board of directors, applied in practice, including defining, measuring, and monitoring risks.
2. Updating operational risk files (Risk Profile), including all types of operational risks and control procedures limiting them. Periodic reviews ensure their efficiency and continuous operation at the level of each unit in the company. Reports are submitted to the risk management committee.
3. Building a database of operational errors, analyzing and submitting periodic reports focusing on these errors and their quality to senior executive management and the risk management committee/board of directors.
4. Building, identifying, and monitoring Key Risk Indicators (KRIs) at the company level. Reports are submitted to the relevant units in the company on the results of these indicators for them to monitor and implement corrective actions to address risks before they occur.
5. Evaluating work procedures and policies and ensuring the identification and correction of any weaknesses or control gaps in the regulatory procedures.
6. Continuous assessment of operational risks through the preparation of periodic reports submitted to the risk committee, in addition to field visits by operational risk department employees to branches to assess and address risks.
7. Establishing an operational procedures manual for all operational activities in branches according to optimal control standards and implementing it in the field to ensure uniform practices and reduce operational errors.

3. Liquidity Risks:

These are risks that arise from the possibility of the company being unable to provide the necessary financing to meet its obligations on their due dates or to finance its activities without incurring high costs or losses. The liquidity problem is summarized as a type of risk under the name of "Liquidity Risk Funding".

4. Market Risks:

These are risks that expose positions inside and outside the company's financial center to losses due to fluctuations in market interest rates, whether creditor or debtor.

Market risks arise from the following:

- Changes that may occur in political and economic conditions in the market.
- Fluctuations in interest rates.

The company manages market and liquidity risks within the following parameters:

1. The company established the ALCO Committee, which is the Asset and Liability Management Committee. This committee monitors and supervises the following:
2. The liquidity position in the company and making necessary decisions/recommendations to obtain external financing or repay it based on the compressed or relatively comfortable liquidity position.
3. Regularly monitoring liquidity to control the risks of liquidity instability and making necessary decisions and timely recommendations that contribute to decision-making.
4. Preparing a contingency plan for liquidity management.
5. Preparing periodic reports to study the market in-depth, liquidity gaps, and submitting them to the risk committee.
6. Studying the impact of economic and political fluctuations on interest rates and assessing associated risks.

5. Risks on Information Security and Protection:

These are risks arising from the threat to the company's information in terms of confidentiality, integrity, and availability. A unit for information security and protection was established to provide protection for information, users, and assets through policies and procedures that ensure the sustainability of protection. This is done by using means and supplies that detect, examine, and develop the work environment into a more secure one.

To enhance information security and protection, the company manages information security and protection risks within the following principles:

1. Introducing and reviewing information security policies and updating them to be in line with international standards.
2. Regular monitoring of systems, servers, and peripheral devices through specialized programs, and countering any threat by establishing an operations center for this purpose.
3. Reviewing and monitoring access permissions to systems and servers, distributing them according to policies, the nature of work, job titles, and necessary approvals.
4. Conducting periodic scans of systems and reviewing internal and external security vulnerabilities.
5. Training and raising awareness among company employees about information security and protection risks and how to deal with this issue by providing training courses and informative newsletters.
6. Preparing periodic reports showing internal and external information security risks and submitting them to the risk management committee/board of directors regularly to keep up with business developments.

10.2- Compliance Management:

These are risks arising from the possibility of the company not complying with applicable laws, regulations, instructions, financial and professional laws, and ethical standards issued by local and international regulatory authorities, including the company's internal policies.

In this context, the Compliance Department was established as an independent department reporting to the risk and compliance committee/board of directors. This department submits its reports to them to mitigate the risks of non-compliance.

Compliance risks are managed based on the following principles:

1. The existence of a compliance policy, periodic development, approval by the board of directors, dissemination to all employees in the company, and regular review.
2. Taking necessary actions to verify the company's compliance with instructions and laws governing the company's operations and the microfinance sector.
3. Studying policies, work guides, and approving them to ensure their consistency with the laws and instructions of the Central Bank and applicable laws.
4. Providing advice and guidance on the proper application of instructions and laws, including internal laws and policies, governing banking operations.
5. Communicating changes related to instructions to achieve common goals and sharing them with the business sector at the appropriate time.
6. Acting as a point of contact with regulatory authorities and assisting senior executive management in maintaining good relations with regulatory authorities.
7. Providing training and awareness to management and employees regarding compliance requirements.
8. Managing money laundering and terrorism financing risks through its dedicated unit within the compliance department, where the following actions are taken:
 - Implementing and developing an automated system to combat money laundering and terrorism financing to verify all unusual financial transactions.
 - Classifying customer risks based on a risk-based approach.
 - Providing reporting and notification channels at the company level for the purpose of protecting the company from any risks related to its exploitation for passing any suspicious transactions and taking notification actions by the reporting manager of suspicious name's.
 - Evaluating money laundering and terrorism financing risks that may arise regarding the development of new products and those that may arise from the use of new technologies and taking appropriate measures to manage and reduce these risks, automatically and periodically checking whether any of the company's current or potential clients are included in the lists of persons prohibited from dealing with them internationally.

10.3- Internal Audit:

- To ensure the efficiency and effectiveness of internal audit activities, this department is directly linked to the board of directors/audit committee and is not assigned any executive tasks to ensure its complete independence. The internal audit management submits its reports to the chairman and members of the audit committee, ensuring and enhancing the independence of internal auditors and giving them an appropriate position in the company's organizational structure. It ensures that they are qualified to perform their duties, including the right to access all records and information and communicate with any employee within the company, enabling them to perform their assigned tasks and prepare their reports without external interference. The board is also required to take necessary actions to enhance the effectiveness of internal auditing by emphasizing the importance of auditing process and monitoring the corrective actions. The internal audit department is developing its own strategy and identifying an audit plan for approval by the audit committee. The audit committee verifies the availability of adequate resources and qualified personnel to manage internal auditing and provide necessary training.
- The internal audit management performs its tasks and prepares its reports without any external interference. It has the right to discuss its reports with the audited departments, including the primary responsibility of internal audit management, which must be based on risk, reviewing at a minimum:
 1. Verifying the adequacy of the company's control and internal control systems for its activities and ensuring compliance with them, reviewing any encroachments on the structure of these systems, and documenting that.
 2. Establishing the internal audit charter and approving it by the board based on the recommendation of the audit committee, including the tasks, authorities, and methodology of its work.
 3. Preparing an audit plan that includes the company's activities, including the activities of other control departments and activities assigned to external parties, based on the degree of risk of those activities. It must be approved by the audit committee with a detailed report prepared in this regard.
 4. Monitoring violations and observations in reports from regulatory authorities and external auditors, ensuring that they are addressed, and ensuring that the executive management has the appropriate controls to prevent their recurrence.

5. Compliance with internal company relative policies, standards, procedures, laws, and instructions.
6. Keeping internal audit reports and documentation, for a period agreed upon in accordance with the prevailing legislations, in an organized and secure manner and making them available for review by the regulatory authority and the external auditor.

Customer Complaints Management

In accordance with the internal procedures for dealing with customer complaints of financial and banking service providers, numbered 1/2017, issued by the Central Bank on August 28, 2017, the Customer Complaints Unit has been established. It has been equipped with qualified human resources and automated systems, administratively falling under the Risk Management.

The unit is responsible for managing and processing customer complaints based on the following principles:

- Developing and continuously updating procedures for managing customer complaints and obtaining approval from the board of directors.
- Adopting and disseminating customer protection policies and procedures with fairness and transparency.
- To provide communication channels to receive customer complaints through the following:
 - Directly reaching the customer complaints unit at 065666100 or the toll-free number at 080022120.
 - Email: complaint@microfund.org.jo.
 - Fax: +96265664000.
 - Personal attendance at the general management building.
 - Customer complaints boxes at the branches.
 - MFW's application.
 - MFW's website.
 - MFW's social media channels.
- Conducting a study and assessment of customer complaints to understand the actual circumstances, concentrations, classifications, and effectiveness.
- Providing the Central Bank of Jordan with periodic statistics (quarterly) on complaints received by the unit.

Here is a statistical overview of the complaints received from customers during the year 2021 through various channels, distributed according to interest rates, commissions, fees, contracts, guarantees and guarantors, product/service, professional conduct behavior, marketing, late fines and fees, collection procedures, working environment, and others.

Interest Rates, Commissions, and Fees	Contracts	Guarantees and Guarantors	Professional Conduct Behavior	Marketing	Late Fines and Fees	Collection Procedures	Work Environment	Other
0	38	0	130	0	0	314	53	0
0.00%	7.10%	0.00%	24.30%	0.00%	0.00%	58.69%	9.91%	0.00%

These complaints were handled within the following framework:

- Assigning reference numbers to complaints and providing customers with them for follow-up.
- Studying and analyzing complaints and responding within specified time frames based on the classification and nature of the complaints.
- Recommending proposed measures to reduce the recurrence of these complaints in the future, including:
 - Modifying work procedures as needed.
 - Taking administrative actions against negligent employees.
 - Training and developing staff on work procedures, products, customer communication skills, etc.
 - Enhancing the company's various locations to welcome customers and improve the services provided to them.

Quality System:

- The Comprehensive Quality Department was established as part of the Strategic Planning and Business Development Department to build the quality system, recognizing the need to adhere to the best standards in the microfinance sector and the global standards acknowledged by institutions and companies striving to provide the best services to beneficiaries. This is done while considering the regulations and instructions issued by legislative and regulatory authorities, including the Central Bank of Jordan.

- Since its establishment, the department has adopted the standards of the Quality Management System (ISO 9001:2015), resulting in obtaining the recognition certification in 2022.
- The comprehensive quality department is responsible for preserving and monitoring the preparation of policies and procedures, readjusting some activities within the procedures to increase efficiency and effectiveness, ensuring compliance with controls, and ensuring continuous improvement of multiple activities. This aligns with the strategic objectives of MFW, considering its vision, mission, and social performance objectives.

11- Disclosures Regarding the Implementation of International Financial Reporting Standard (IFRS 9):

The company calculates the credit loss provisions in accordance with IFRS 9. The International Accounting Standards Board issued the final version of International Financial Reporting Standard 9 in 2014, which is related to financial tools and allocations. This standard replaces the International Accounting Standard, and the company has applied the standard through a partnership with EY by contracting separate consultations to carry out the calculation process of the allocations.

This standard introduces fundamental amendments to the methods used in calculating allocations for banks and financial companies. The current concept of monitoring allocations is based on monitoring actual allocations for realized losses due to overdue debts. However, the new standard is built on monitoring allocations based on proactive expected credit losses.

In general, the equation is calculated as follows:

$$\text{Expected Credit Loss} = \text{Probability of Default} \times \text{Exposure at Default} \times \text{Loss Given at Default.}$$

The company has developed a methodology for calculating credit losses in collaboration with EY, preserving accounts falling within Stage 3 within a time frame in case the customer repays the due installments and moves to Stage 2 or Stage 3.

The following is the most important information and definitions used by the company to apply this standard:

1. Default: default occurs when payment stops, and the scheduled financing payment becomes overdue for 90 days or more, indicating a tangible awareness of the client's inability to fulfill the contractual commitment to the company.
2. Probability of Default: represents the risks of the customer's inability to fulfill obligations to the company.
3. Exposure at Default: represents the outstanding balance for the customer when default occurs, classified as non-performing facilities.
4. Loss Given at Default: represents the company's loss incurred when extinguishing bad debts, according to the equation (recovery ratio - 1).

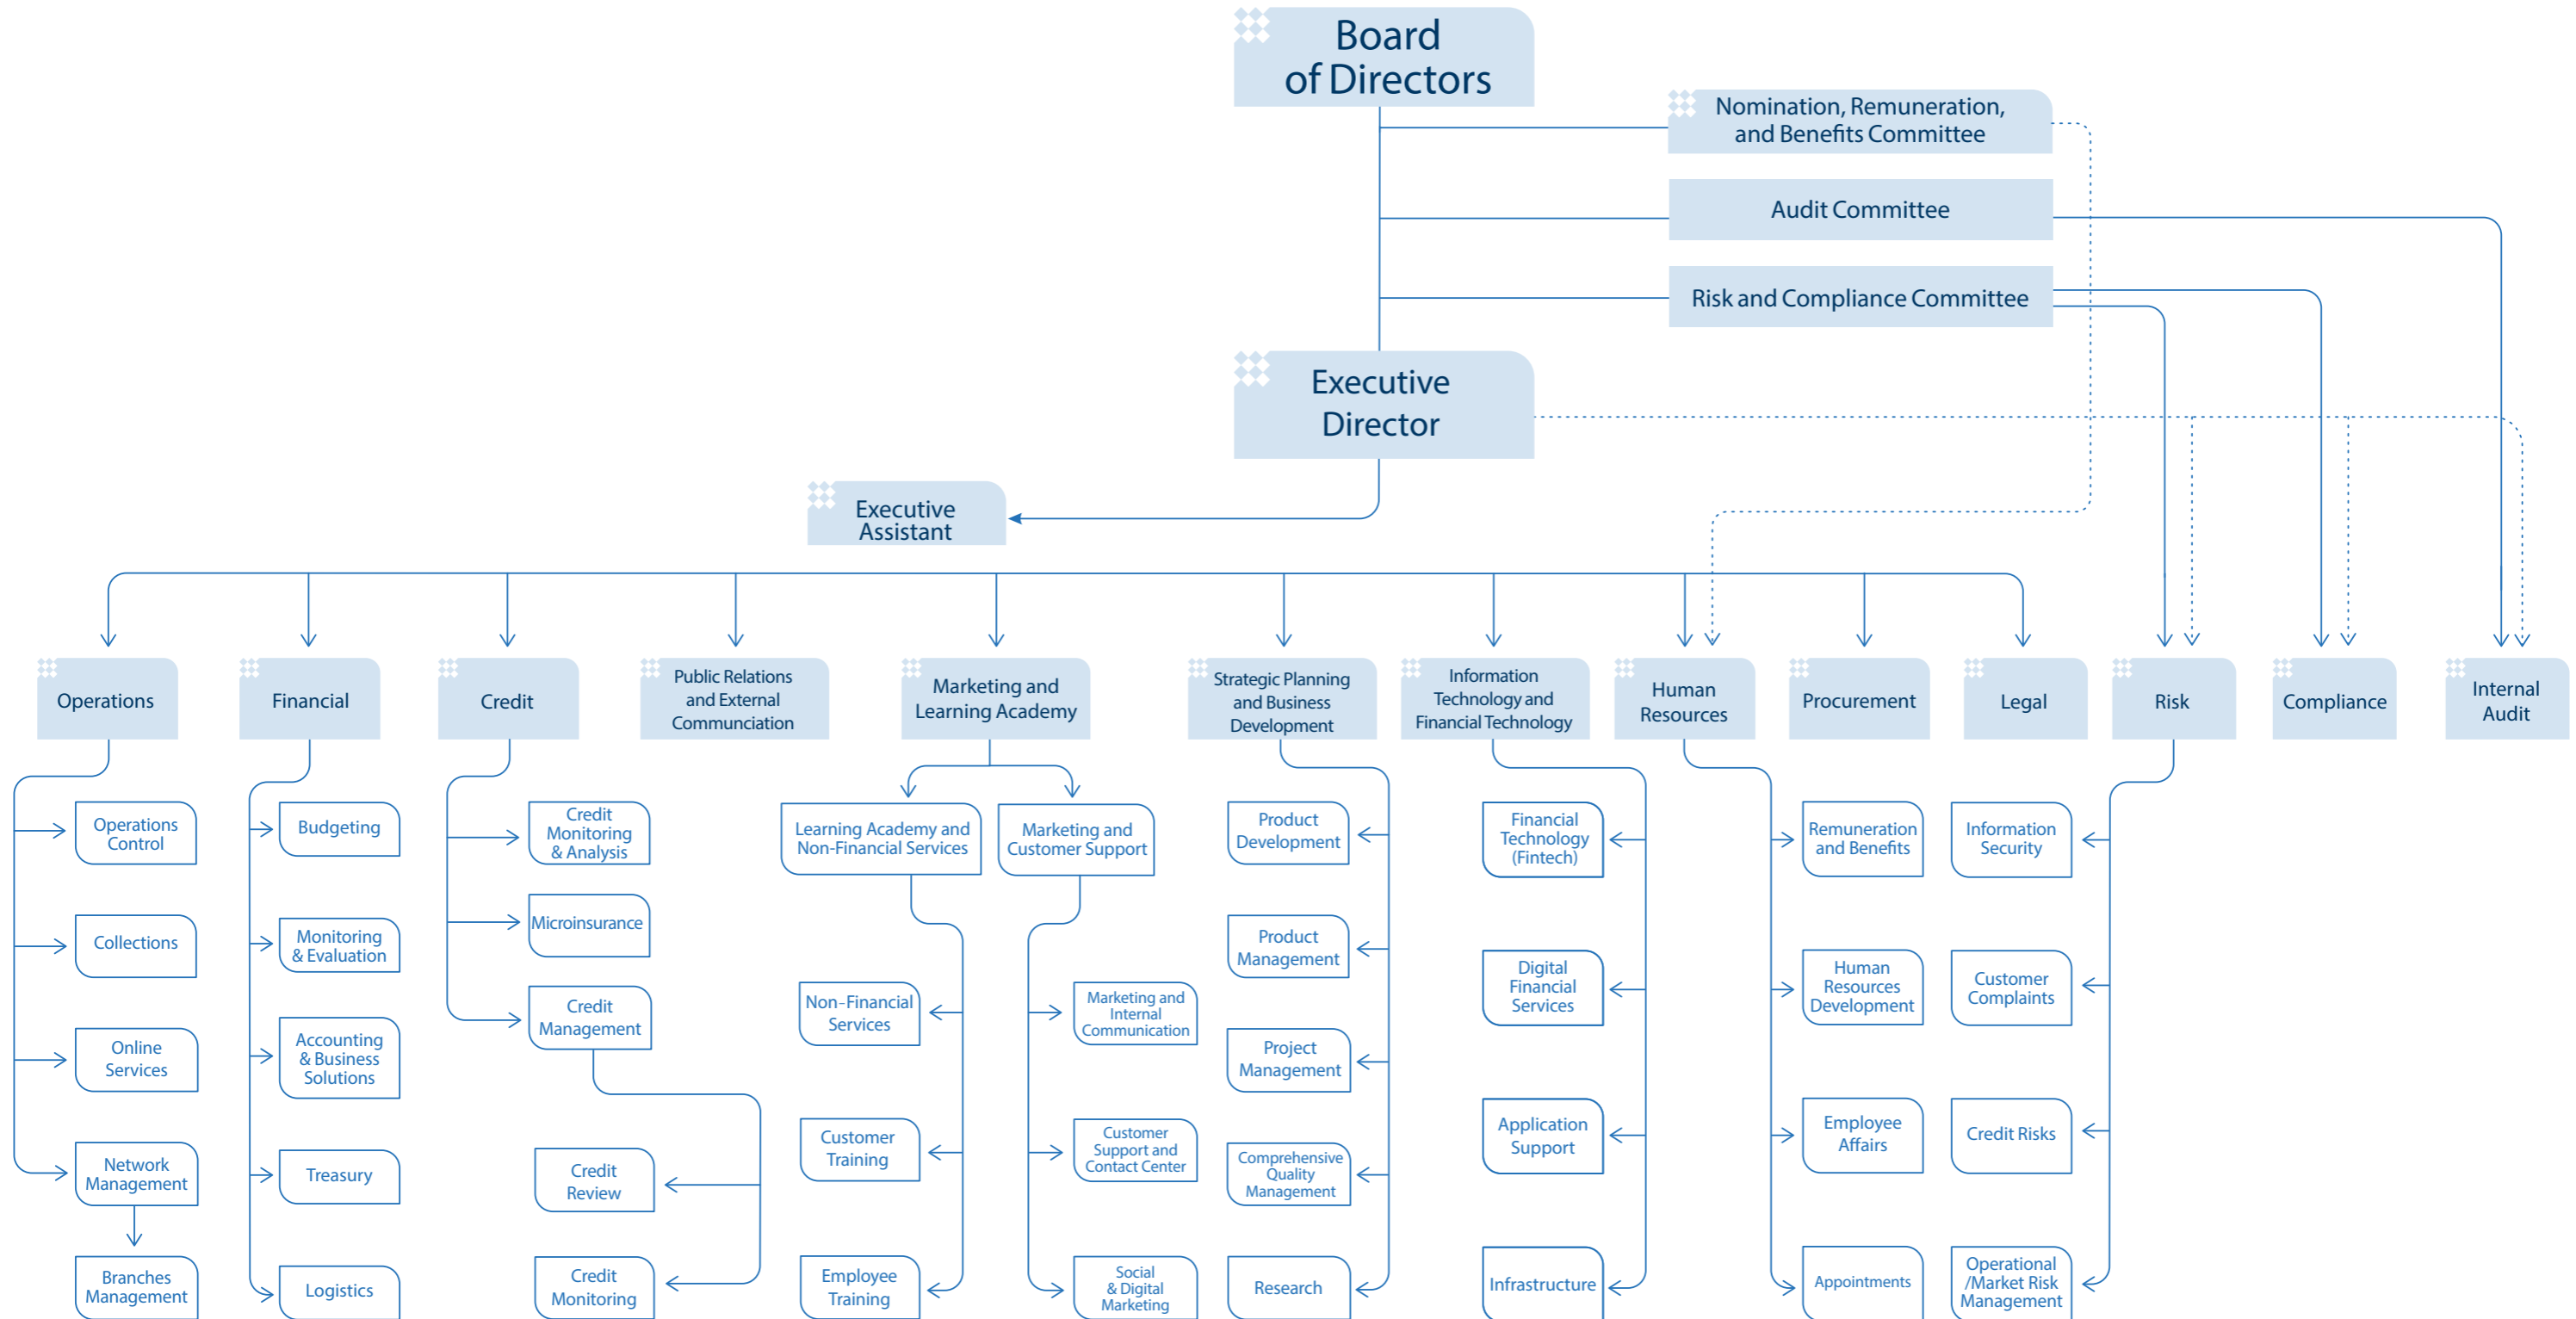

Additionally, according to the accounting standard, the delay periods and debt classification stage are divided as follows:

1. Stage 1: Installments due for a period of 30 days or less.
2. Stage 2: Installments due for a period of more than 30 days and up to 90 days.
3. Stage 3: Installments due for a period of more than 90 days, and at this stage, the account is classified as non-performing.

12- Board Statement:

- The company's board of directors acknowledges the absence of any substantial matters that may affect the company's continuity during the fiscal year 2023.
- The board of directors acknowledges responsibility for preparing financial statements and providing effective control and oversight systems in the company.
- The board of directors affirms the accuracy, correctness, and completeness of the data and information provided in the annual report.

Organizational Structure 2023

Our Partners

Through a growing network of partnerships with local and global organizations and companies specialized in providing and developing high-quality financial and non-financial products and services, MFW seeks to support its vision and mission by offering a diverse range of financial and non-financial services that contribute to achieving financial inclusion, providing the best in microfinance industry.

Beneficiaries Financing

Protecting and Developing the Projects and Skills of Beneficiaries

Company Branch Locations

Our branch network extends and is distributed across all twelve governorates of the Kingdom, from north to south. This expansion aims to reach all entrepreneurs and starters of small and micro projects in all cities, villages, and provinces.

Because we are part of the community and facilitating access is important to us, our branch network covers 63 locations. You can find the nearest branch to you, along with location details and phone number, in the table below.

Branch	Contact Information	Location
Nazzal	06-4384665	Nazzal - Al Dustur Street - Ghazi Al Bdawi Building (2) - Beside the Jordan Islamic Bank - Above the Civil Status and Passports Department - 2 nd Floor
